

WELDING PRESSES

For the welding of plastic conveyor belts

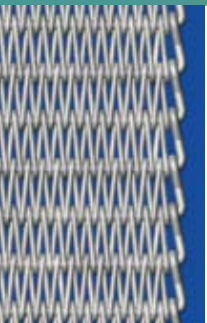

- simple operation
- mobile
- light weight
- for 60° and 90° joints

WIDE SPIRAL LINK BELT

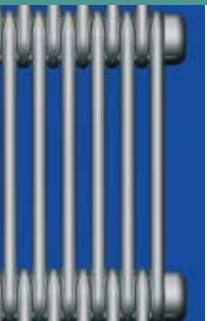

- for conveyor furnaces
- for drying, roasting, cooling
- continuous frosters
- cooking lines
- for the transport of lightweight to medium heavy single pieces

ROUND WIRE LINK BELT

- for conveyor furnaces
- for drying, roasting, cooling
- continuous frosters
- cooking lines
- for the transport of lightweight to heavy single pieces

LOOP-JOINED WIRE BELT

- continuous freezer
- washing plants
- pasteurising and sterilising plants
- foundry plant
- for the transport of medium-heavy and heavy goods

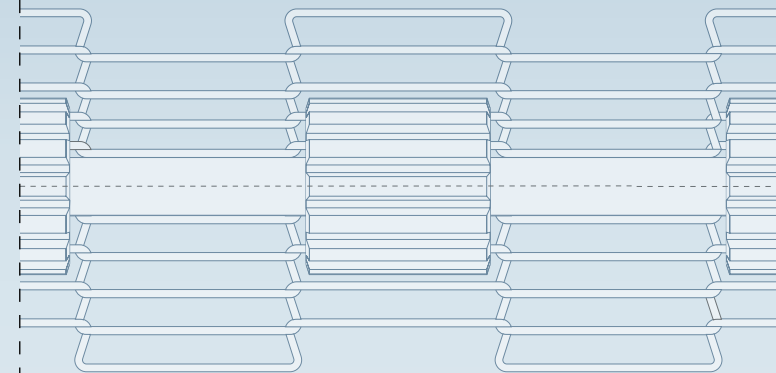

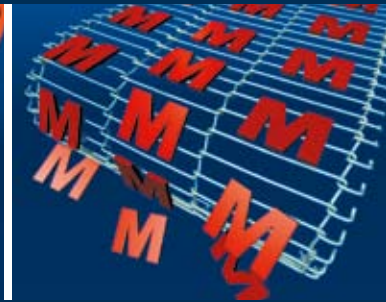

Transportbänder · Conveyor belts · Bandes transporteuses

PRODUCT OVERVIEW

MÄRTENS Transportbänder GmbH & Co. KG
Lise-Meitner-Str. 18
D-24941 Flensburg
Germany

ROD NETWORK BELT

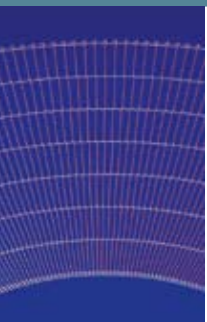

- For enrobing, cooling, drying, spreading, breasting, packing, heating, cleaning...
- coating grids in the chocolate industry
 - meat and fish industry
 - poultry
 - baking
 - textile dryers
 - transport of printed circuit boards
 - shrink wrapping

ROD NETWORK BELT WITH CHAIN GUIDE

- best grade of power transmission
- top stability
- for special applications with larger widths

CORNER ROD NETWORK BELT

- transport around corners of lightweight goods without dislocation
- corner angles from 30° to 180°
- spare belts for all known corner systems
- dimensions for individual requirements

DRIVE SHAFTS AND SPROCKETS

- precisely timed matching and production of the sprockets according to the dimensions of the respective rod network belt
- optimal drive guaranteed

PU CONVEYOR BELTS

- cooling lines in the sweets, chocolate and bakery industry
- feeding, transfer and take-off stations
- automatic weighing machines and sorting devices in the packaging industry
- transport of lightweight and moderately heavy goods in many industry areas
- corner conveyor belts on round tables

PU CONVEYOR BELTS WITH EMBOSSING

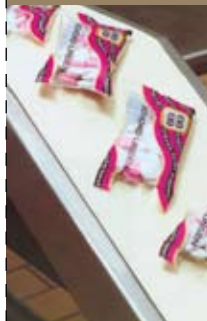

- brand names, logos or neutral designs
- to add a unique quality to your product
- as a protection against product piracy

PVC CONVEYOR BELTS

- meat and fish processing
- cooling lines in sweets, chocolate and bakery industry
- packing devices
- transport of lightweight and moderately heavy goods in many industry areas
- corner conveyor belts on round tables
- with cleats and corrugated edges on ascending conveyors

SILICONE CONVEYOR BELTS

- ascending conveyors
- cooling conveyors
- for sticky masses as caramel, nougat, granulate or adhesives

SILICONE MOULD BELT

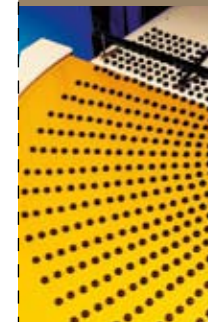

- molding, cooling and transport in 1 operation
- shaping according to customer requirement

EXPANDING BELTS

- product separating in order to avoid product contact
- convergence before the packing in the chocolate and sweets industry
- expanding tables for robot packing

CONVEYOR DISCS

- equipment for corner conveyors for the transport of lightweight and medium-weight products in all industry areas
- for all corner conveyors from 35° to 180° and even more
- made of different materials (PU, PVC, Silicone)

ENDLESS WOVEN CONVEYOR BELTS

This group is special due to the fact that there is no subsequent joint due to the weaving of an endless warp thread.

Thus this belt construction is ideal for small deflections and devices with wipers.
